

COMPOSITION: SIMPLICITY

PHOTOGRAPHIC APPLICATION:

Be intentional about your subject – make a clear choice.

CHANGE POSITION:

When you know your subject, minor changes in positioning can help highlight your subject.

GET CLOSER VS ZOOM:

When you know your subject, it's easier to choose to get closer or to zoom in with the lens. Remember, zooming will cause the background to appear closer than it is in real life.

BLUR THE BACKGROUND:

When you know your subject, it's easier to decide if blurring background honors your intentions. There are many options for blurring the background, but it will require experimenting with the technology you use.
